HARDENED CONCRETE			
Test	Test specimen	Testing method	Price per sample SEK
Compressive strength	cube	SS-EN 12390-3	450
	core	SS-EN 12390-3	670
Freeze thaw resistance	cube	SS 13 72 44	1190
	core	SS 13 72 44	1190
	cube / core	SS 13 72 44 (112 days)	1430
Tensile splitting strength	cube	SS-EN 12390-6	610
	core	SS-EN 12390-6	670
Depth of penetration of water under preassure	Prism / cube	SS-EN 12390-8	610
	core	SS-EN 12390-8	670
Bond strength of cores by direct tension	core	SS 13 72 31	1120
Chloride content		VU-SC:51 (SS-EN 14629)	
		- with cement determination	900
		- without cement determination	460
		RCT-method ¹⁾ , powder	390
		RCT-method ¹⁾ , core	490
Cement content		VU-SC:50 (EDTA with murexid indicator)	560
Carbonation depth		SS 137242	170
Hydraulic conductivity		VU-SC:52	Per agreement
Comp testing according to "Svensk Betongs Kvalitetsmanual" (not accredited)			2130
Sprayed concrete			
Test	Test specimen	Testing method	Price per sample
Compressive strength	cube	SS-EN 12390-3	1020
Depth of penetration of water under preassure	prism	SS-EN 12390-8	950
Fiber content		SS-EN 14488-7	1260
Flexural strength	beam	SS-EN 14488-3	1550
Flexural strength	round panel	ASTM C1550 ¹⁾	Per agreement
Aggregate			
Test	Testing method		Price per sample
Particle size, sieving	SS-EN 933-1		1170
Air jet sieving	SS-EN 933-10		1170
Humus	SS-EN 1744-1		620
Petrographic description	SS-EN 932-3		5400
Patricle density and water absorption	SS-EN 1097-6		4330
Thin section	RILEM AAR-1 ¹⁾		Per agreement

¹⁾ Not accredited testing
