

Price list 2022 Accredited testings

HARDENED CONCRETE			
Test	Test specimen	Testing method	Price per sample SEK
Compressive strength	Cube	SS-EN 12390-3	470
	Core, prism	SS-EN 12390-3, SS-EN 196-1	690
Freeze thaw resistance	Cube	SS 13 72 44 (56 days)	1230
	Core	SS 13 72 44 (56 days)	1230
	Cube / core	SS 13 72 44 (112 days)	1470
Tensile splitting strength	Cube	SS-EN 12390-6	630
	Core	SS-EN 12390-6	690
Depth of penetration of water under pressure	Prism / cube	SS-EN 12390-8	630
	Core	SS-EN 12390-8	690
Bond strength of cores by direct tension	Core	SS 13 72 31	1150
Chloride content		VU-SC:51 (SS-EN 14629)	
		- with cement determination	930
		- without cement determination	480
		RCT-method ¹⁾	410
Cement content		VU-SC:50 (EDTA with murexid indicator)	580
Preparation, chloride & cement content	Core	Sawing, grinding	120 per depth
Carbonation depth		SS 137242	170
Hydraulic conductivity		VU-SC:52	Per agreement
Thin & plane section			Per agreement
Comp testing according to "Svensk Betongs Kvalitetsmanual" ¹⁾			2190
Sprayed concrete			
Test	Test specimen	Testing method	Price per sample
Compressive strength	Cube	SS-EN 12390-3	1050
Depth of penetration of water under pressure	Prism	SS-EN 12390-8	980
Fiber content		SS-EN 14488-7	1290
Flexural strength	Beam	SS-EN 14488-3	1590
Flexural strength	Round panel	ASTM C1550	Per agreement
Aggregate			
Test		Testing method	Price per sample
Particle size, sieving		SS-EN 933-1	1180
Air jet sieving		SS-EN 933-10	1180
Humus		SS-EN 1744-1	630
Petrographic description		SS-EN 932-3	5430
Particle density and water absorption		SS-EN 1097-6	4350
Thin section		RILEM AAR-1 ¹⁾	Per agreement

¹⁾ Not accredited testing

All of the above prices include sawing and grinding as well as disposal costs.
When testing a larger number of test specimens, a quote can be submitted.
We are accredited for approx. 50 test methods, see our website. Order form is available on our website.
